

# Holme Parish Statement (draft)

Photo needed here

Holme settlement is located at the top of the Holme Valley, approximately 3 miles southeast of Holmfirth. The A6024 Woodhead Road runs through the settlement, giving access to the A628 Woodhead Pass.

Due to the poor soils and exposed located, the area was initially inhabited by a few scattered sheep rearing farmsteads. The settlement of Holme developed as a result of wool weaving in the home from the 13th century onwards and evidence of this can be seen in the 17th and 18th century cottages, which had first floor weaving rooms characterised by 'weaving windows', and weaving sheds which have since been converted into residential properties. However, the area had a good supply of water which made it attractive to mill owners. The process of weaving within the home disappeared during the late 18th century as purpose built weaving mills were constructed in the locality.

The supply of water was also resulted in 3 reservoirs being built around Holme, Digley, Brownhill and Yateholme.

Holme is located on densely enclosed grit stone upland in the Dark Peak (Landscape Strategy and Action Plan 2009).
