What is the Farming in Protected Landscapes Programme?

The Farming in Protected Landscapes programme has been created by Defra and it forms part of the Government's Agricultural Transition Plan (ATP).

It will provide funds to allow farmers and land managers to work with Protected Landscape organisations (National Park Authorities and Areas of Outstanding Natural Beauty teams) to provide benefits for nature, climate, people and places. The programme will run from mid-2021 to April 2024.

A more detailed overview of the programme

Our Protected Landscapes (PLs) – our National Parks and Areas of Outstanding Natural Beauty (AONBs) - are special and unique and need to be managed, enhanced and protected while also supporting the farmers¹ and communities who work within them and the wider local economy.

The Farming in Protected Landscapes programme, which will operate in England, will provide additional investment in these places to allow farmers to work in partnership with Protected Landscape bodies to deliver bigger and better outcomes for the environment for people and for the place.

Protected Landscapes can make an important contribution to:

- **Climate** – delivering net zero with nature and nature-based solutions to help communities adapt to the unavoidable effects of climate change;
- **Nature** – playing a leading role in the delivery of the Nature Recovery Network and achieving the PMs commitment to protect 30% of land by 2030;
- **People** – providing a natural health service that will improve the nation's public health and wellbeing through increased access to nature across all parts of society, as part of our green recovery;
- **Place** – creating centres of excellence and green innovation that are flourishing places to live and work, each with a strong identity and cultural heritage, and high recognition as attractive visitor destinations

As part of the Agricultural Transition Plan, the government has committed to help farmers and land managers deliver against these four areas, in a holistic way - in order to meet the requirements of individual Protected Landscapes, helping strengthen their special importance and enhance their environments and accessibility.

The programme will be delivered by farmers, working in partnership with Protected Landscape teams – Protected Landscape teams and farmers living and working in these areas know the opportunities and challenges facing their landscapes and communities the best. This is an opportunity for Protected Landscapes, farmers, and others within these areas to work better together, leading work at an individual landscape level, building on existing relationships.

The programme will be project based and take a bottom up approach - this means that funding will support individual projects proposed by farmers, and approved by Local Assessment Panels, which will support Protected Landscapes' local priorities.

¹ 'Farmers' - refers to both farmers and other land managers in the private public and charity sectors.

This is a time limited programme (2021-2024) to provide additional investment in our most special places - it will work alongside – not in competition with - existing schemes and add value where it is most needed. Over the longer term, Defra would envision the Sustainable Farming Incentive, the Local Nature Recovery scheme and the Landscape Recovery scheme playing a specific part across these landscapes, with farmers who lead on Farming in Protected Landscape projects taking part in one of these schemes.

Who can apply?

Applications will be accepted from farmers and land managers within an AONB or National Park in England, or the Norfolk Broads. The programme may also support activity on other land where that activity can demonstrate benefit to the Protected Landscape, or the Protected Landscape organisation's objectives or partnership initiatives. Your Farming in Protected Landscape officer can advise on whether your land / project is eligible.

You can check if your land is within the boundaries of a protected landscape on the [MAGIC mapping website](#). Follow these steps:

1. select Designations
2. select Land-based designations
3. select Statutory
4. untick all boxes apart from Areas of Outstanding Natural Beauty (England) and National Parks (England).

This programme does not support works on domestic property.

You can receive funding through the programme for work in the above places if you:

- Are a farmer or land manager (including individuals, charities and some public bodies)
- Are collaborating with an eligible farmer / land manager (or a group of farmers/land managers) to deliver an eligible project
- Own, or have management control of, all the land affected by the project, or have the formal consent of the person who does.

Common land is eligible for support through the Programme. You can apply as a landowner with sole rights, or as a group of commoners acting together.

Applications will also be accepted from organisations and individuals delivering projects which are in support of the programme outcomes and the relevant Protected Landscape Management Plan/Priorities, as long as they are applying in collaboration with a farmer or land manager.

A summary of bodies/organisations who are directly eligible is set out below:

Body/Organisation	Can I apply?	Additional Information
Government departments, executive agencies and NDPBs (for example, Ministry of Defence, Forestry Commission), with exception of the bodies listed below in this table:	No	None
Natural England	Yes	For work on the National Nature Reserves which goes beyond other legal obligations
Other public bodies (including National Park Authorities, The Broads Authority, Conservation Boards and AONB Partnerships through their accountable bodies)	Yes	Provided the work goes beyond the duty of regard and other legal obligations
County, Unitary, District, Parish Council and former college farms	Yes	None
Tenants of eligible public bodies	Yes	Ineligible where the work is already a requirement of the tenancy agreement. The public body must countersign the application if the tenant does not have security of tenure for the full term of the agreement.
Tenants of ineligible public bodies	Yes	Ineligible where the work is already a requirement of the tenancy agreement. Tenants must have security of tenure for the full term of the agreement, as the public body cannot countersign the application.
Other organisations and individuals	Yes	Where the proposed activity or works is in support of programme aims

Tenancy

If you are including land in an application that you occupy under a tenancy, including under the Agricultural Holdings Act 1986, Agricultural Tenancies Act 1995 (a Farm Business Tenancy) or equivalent, you must have:

- management control of this land for the duration of any commitments
- control of all the activities needed to deliver the project,
- the consent of the landlord as required.

Landlords

If you are a landlord and can show that you have management control over land which has been let to a tenant, and the activities, you can include that land in an application.

Common land, shared grazing and other collaborative projects

If the application is made by the landowner who owns the whole common and has sole use and rights to the land, the common can be entered as the landowner's holding.

Protected Landscape organisations and other bodies may be able to facilitate collaborative projects as a lead or responsible partner. Regardless of who applies, if the application is made by someone who does not have sole use of all the land and where there will be two or more beneficiaries to the agreement:

- an internal agreement must be established, signed by all the parties to the application, specifying the obligations placed on each person and the payments they may expect to receive
- a copy of this internal agreement will need to be submitted before the agreement can commence and may, during the agreement period, need to be supplemented by formal evidence that the internal agreement operates effectively e.g. minutes of recent meetings.
- in all cases where there are 5 or more parties benefiting from or contributing to the delivery of the agreement on common land, a more formal commons association must be established with officers to manage the association.

Collaborative Farmer groups

You can apply to the programme as part of a collaborative farmer group. You can choose out of the below three options how you and your collaborative farmer group would like to apply.

You can:

- apply through a lead applicant, who takes on the task of distributing resources to the group, managing the application process and reporting on the progress of the project.
- apply through a third party that is not part of the collaborative farmer group but acting on the behalf of the collaborative farmer group (e.g. an environmental charity). The third party will distribute the resources to the group, manage the application process and report on the progress of the project.
- apply through your Protected Landscape body who may have experience of working with the whole group or some its members (this would be subject to a panel decision like all other applications). Your Protected Landscape can make

individual payments to farmers in the collaborative farmer group or pay for necessary works and activities directly. Your Protected Landscape body will distribute the resources to the group, manage the application process and report on the progress of the project.

You will need to have partnership agreements between the participants and the lead applicant / applicant body. Your Protected Landscape team can support you to develop these.

What can I apply for?

You will need to demonstrate how your project:

- (1) Delivers against at least one of the Programme outcomes and to provide the details of any partners with whom you have chosen to work. There are four themes in which the programme outcomes are defined by; Climate, Nature, People and Place.
- (2) Connects to the priorities of your Protected Landscape's management plan, as laid out by your local Protected Landscape team

The outcomes, of which you will need to demonstrate that your project delivers against at least one, are listed below under four key themes:

Climate

- More carbon is stored and/or sequestered
- Flood risk has been reduced
- Better understanding among farmers, land managers and the public as to what different habitats and land uses can deliver for carbon storage and reduced carbon emissions
- The landscape is more resilient to climate change

Nature

- There is a greater area of wildlife rich habitat
- There is greater connectivity between habitats
- Existing habitat is better managed for biodiversity
- There is an increase in biodiversity

People

- There are more opportunities for people to explore, enjoy and understand the landscape
- There are more opportunities for more diverse audiences to explore, enjoy and understand the landscape
- There is greater public engagement in land management, for example through volunteering

Place

- The quality and character of the landscape is reinforced or enhanced
- Historic structures and features are conserved, enhanced or interpreted more effectively
- There is an increase in the resilience of nature friendly sustainable farm businesses, which in turn contributes to a more thriving local economy

Examples of the types of work or projects that are relevant to the outcomes of this programme could include

- Creating scrapes, ponds or other wetland to support a variety of wildlife
- Providing new or easier access opportunities, links to the Public Rights of Way network, or providing interpretation of farming, nature and heritage
- Parking improvements at a key site to provide safe access to popular walking routes and reduce congestion for visitors and for local residents
- Restoring drystone walls or hedges
- Conserving historic features on a farm, such as lime kilns or lead mining heritage
- Action to reduce carbon emissions, or the use of plastics, on a farm

Projects brought forward under the third of the Place outcomes - *There is an increase in the resilience of nature friendly sustainable farm businesses, which in turn contributes to a more thriving local economy* - must deliver this in balance with and directly linked to other programme outcomes across the four themes. High cost items may fail the value for money test unless they are delivering against multiple other outcomes.

Examples would include:

- A new or enhanced livestock facility which allows in-wintering of stock and prevents priority habitat or historic features being damaged.
- Glamping pods linked to experiencing nature recovery work on farms and supported by interpretation or new access.
- Buying a small-bale baler and cutting equipment (including second hand) to use on hay meadows to sell small-baled hay to e.g. local horse owners, smallholders etc.

This outcome is not intended to support all commercial activity on farms. Other, more general business resilience and productivity measures are better suited to other funds which are being brought forward by Defra, e.g.:

- Farming Investment Fund (from autumn 2021) will offer funding for equipment, technology, and infrastructure that improves farm productivity and benefits the environment.
- The Slurry Investment Scheme, which will be offered from 2022, which will help to reduce pollution from farming and contribute to the government's 25 Year Environment Plan and Net Zero commitments.
- Other schemes which may emerge from Government.

You will also need to ensure that your project delivers the management plan/priorities of the Peak District National Park Management Plan.

The management plans/priorities for Peak District National Park are as summarised in the Farming In Protected Landscapes Peak District National Park Authority Summary including emerging priorities at [Farmers and land managers: Peak District National Park](#).

For further advice on the types of projects that this programme can deliver please speak to your Protected Landscape team.

What costs can I apply for?

Maximum grant allowance

The maximum grant you can apply for through this programme is £250,000 although it is anticipated that the average grant will be a much lower amount. Once established the Farming in Protected Landscapes Local Assessment Panel (LAP) may reduce the maximum grant unless there are exceptional circumstances.

Minimum grant allowance

There is no minimum grant you can apply for through this programme.

Capital and Revenue Spend

You can apply for both capital and revenue spend.

Revenue spend is where funding is provided to support management actions which deliver Farming in Protected Landscape objectives.

Capital spend is where funding is provided to purchase or invest in a physical asset (capital item) to achieve a stated outcome, for example increased business prosperity or improvements to the environment. Capital items can be natural landscape features (such as trees, hedgerows and ponds) or built (such as fencing, water, infrastructure, buildings, machinery and equipment).

Payment and Intervention Rates

The purpose of the programme is to enable additional support where it is most needed for farmers and other land managers in Protected Landscapes – and delivering for climate, nature, people, and place. As with Countryside Stewardship, some projects that achieve these ends will inevitably have a commercial dimension, and this factor is reflected accordingly in the payment rates.

You should be aware that the programme is designed to fund additional activities that deliver our programme goals in ways that are most effective for local areas. It will not provide subsidy for normal private sector interests. All applications will be rigorously reviewed to ensure there is no overlap with other programme funding or grant schemes. For any further queries on this matter, please contact your Protected Landscape team.

Where there is a Countryside Stewardship rate for the work you want to do, that rate will also be used in the Farming in Protected Landscapes programme.

Where you are applying to fund an activity for which there is no standard Countryside Stewardship rate, you will need to be able show that the associated costs represent value for money - this is based on getting quotes for the work. Your Protected landscape team can advise you on this.

Where there is no obvious commercial benefit to doing the work (e.g. it may be solely focused on nature recovery) you can be paid 100% of the eligible costs. Where the work generates commercial benefit to the applicant, generally this will either be 40% or 80% of eligible costs.

A project may consist of a range of actual cost or bespoke items and Countryside Stewardship equivalent options, specific to the project being proposed and outcomes being targeted. Funding on an actual cost basis may also be underpinned or in combination with

other Countryside Stewardship equivalent options on the same land, where the option requirements do not conflict. By combining option(s) on the same area, where they do not conflict, multiple objectives can be met.

Your project may also be part of and include other programmes or schemes on your farm that enhance or complement the project outcomes. Although it is important to ensure that there is no double funding for the same activity, delivering with other projects or schemes is likely to be reflected in the project scoring and wider benefits.

Please speak to your Farming in Protected Landscape officer for advice on payment rates and intervention rates. You may have different payment and intervention rates for the different activities that make up your project.

You may also want to be paid to do the work yourself rather than through a contractor. This is possible providing it represents a reasonable rate for the job, benchmarked against known costs locally or standard costs.

When can I apply?

For the first year of funding, you can apply from 1st July 2021 – 31st January 2022. You can submit your application at any time during this window, though as funding is limited early applications are encouraged.

The application process

You can find the application form on the website of your local AONB or National Park.

Before you apply

1. Speak to a Peak District National Park Farming in Protected Landscapes Engagement Officer or Farm Adviser for advice on the programme including to discuss your ideas, the payment rates and intervention rates for your project.
2. Check that you are eligible to apply.
3. Read the application questions and guidance. Make sure you keep within the word limit where asked in the application form and answer all the questions.
4. Have your supporting documents ready to submit with the application form.

How you apply

- Please contact your Peak District National Park Farming in Protected Landscape Officer or Farm Adviser when developing your project and before submitting your application
- Then please either submit your application electronically by email to: - farming@peakdistrict.gov.uk Or in paper form to: -
Peak District National Park Authority
Aldern House
Baslow Road
Bakewell DE45 1AE

Clearly marking your application as – Farming in Protected Landscapes programme grant application.

Once you have applied

- You should expect to hear back from your Protected Landscape team within at the latest 15 working days from the date of your completed and submitted application

How will my application be assessed?

All projects will be scored using a common scoring system. You will be scored against the following categories which will be weighted differently for your final score:

- Project outcomes - this includes deliver under the four themes of Climate, Nature, People and Place and also fit with the Protected Landscape Management Plan (40%)
- Value for Money (20%) – this includes demonstrating an efficient use of resources and cost-reasonableness
- Sustainability / legacy of projects (20%) – this includes demonstrating that benefits could be maintained once the programme funding concludes, and may include the likelihood of behaviour change and increased capacity, as well as more tangible measures.
- Ability to deliver (20%) – this includes demonstrating the capability to deliver in the timelines required

There are a number of requirements you must meet for your application to progress and these will be made clear in the application template. Your Protected Landscape will consider whether you meet the essential criteria for the programme (see under 'who can apply'). If you do not meet the essential criteria, your Protected Landscape will not assess your application further.

For projects with a total fund request of over £5,000

Your application will be assessed by a Local Assessment Panel made up of experts from across your Protected Landscape, including from the farming and land management community, where your project will be given a score using a common scoring system.

For projects with a total fund request of under £5,000

Your application will be assessed by a senior member from your Protected Landscape team who has not been involved in providing advice or guidance to your application. They will assess your application using the common scoring system giving you a score for your project. If you submit more than two applications for fund requests under £5,000 over the course of the programme, the third and any further applications will be assessed at the Local Assessment Panel whatever their value.

Can my project be match funded?

You are encouraged to bring in third party investment. Applications with match funding may increase their value for money scoring as part of the assessment process.

If you want to use third party funding you will be required to provide details of the third-party funding on the application form.

Applicants will be eligible to receive third party funding for Farming in Protected Landscape projects as long as the source of the third party funding is not from the Exchequer.

What kinds of agreements will be needed?

You will not need to maintain any natural, cultural and access activities you deliver as part of the programme after your agreement period ends.

You must maintain capital infrastructure such as fences, gates or restored buildings for 5 years from the completion date.

You must maintain machinery assets such as brush harvesters for grassland restoration for 5 years from the purchase date.

What happens if my holding crosses the boundary of two Protected Landscapes?

If your farm holding crosses the boundary of more than one Protected Landscape and you are interested in applying to the Farming in Protected Landscape programme please speak to an officer in either of the Protected Landscapes in which your holding lies. They will be best placed to advise which Protected Landscape body you should apply to.

Will my project be evaluated?

Defra are funding an external contractor to review the effectiveness of the programme and show what Protected Landscapes bodies can deliver in partnership with farmers and land managers. Successful applicants will need to commit to participating in the programme evaluation; the input expected will be proportionate to the level of funding received.

How does the programme fit in with other Government support for farming?

It's important to note that the programme isn't an agri-environment scheme – it's a programme supporting individual projects, enabling additional investment where it is most useful.

Being in an agri-environment scheme isn't a barrier to receiving project funding through the programme as long as you're not paid twice for the same work.

Your Protected Landscape team will be able to provide you with more details, and guide you through the application process.

Will receiving this funding stop me entering into new environmental land management schemes?

Participants part of the Farming in Protected Landscapes programme should be well placed to enter into environmental land management schemes once the programme ends. Participants will not automatically roll into environmental land management scheme agreements from the Farming in Protected Landscapes programme.

Over the longer term, Defra would envision the Sustainable Farming Incentive, the Local Nature Recovery scheme and the Landscape Recovery scheme playing a specific part across these our Protected Landscapes, with farmers who lead on the Farming in Protected Landscapes programme projects taking part in one of these schemes.

Making an appeal

We understand that you may be disappointed with a decision. If you would like appeal to the decision made you should make an appeal to your Protected Landscape by contacting the Peak District National Park Authority at farming@peakdistrict.gov.uk or in paper form to: -

The Peak District National Park Authority
Farming in Protected Landscapes Team
Aldern House
Baslow Road
Bakewell DE45 1AE

You can only query a funding decision if you think that the Protected Landscape has:

- Made a mistake with the application
- Made a processing error
- Got the law wrong

You must set out to the Protected Landscape team the reason for your appeal under one (or more) of these three criteria.

Appeals will be dealt with by your Protected Landscape team and if necessary escalated to Defra.

Where can I go for more information?

Peak District National Park Authority – [Farmers and land managers: Peak District National Park](#)
