

Matter 5 - Historic Environment

Policy DMC8: As with DMC4, our representation argues for a more pro-active agenda for enhancing settlements, with reference to Conservation Areas, though the Inspector's specific questions do not appear to address this. We would welcome an opportunity to discuss this point.

DMC10: Please refer to our representation. A more refined approach is needed that balances the merits of the building and its contribution to its setting with the impacts - both positive and negative - of domestication, not just on the special qualities of the Park, but on the characteristics and needs of the location.
