DESCRIPTION

The proposals are to provide : equal access through the main door, and within the church, as well as a proper means of escape requiring a new doorway as an alternative exit.

These measures include: modifications to the pathways, alterations to the level of the entrance porch and doors ; the implementation of an internal ramp between the north and chancel aisle; as well as the creation of a second doorway in the north chancel aisle.

All these measures are formulated with regards to both enhancing access to and understanding of the significance of the heritage of the site, whilst also better equipping the church to be able to fulfil its ministry.
