**DESCRIPTION**

The proposed development is for a rubberised running/fitness trail around the perimeter of Baslow Sports Field. During the winter months the field becomes unusable due to the muddy conditions and lack of visibility. The proposed trail would measure approximately 360m around the perimeter of the sports field, with a width of 2m.

There is potential for incorporating a ground-breaking LED light system designed by the Sports Technology Department at Sheffield Hallam University. The lights can be programmed in such a way as to guide runners at a certain pace, or to facilitate a number of running-based games for children (and adults!).

Currently there is no such facility available in the local area. With a growing number of people who are taking up running, the rubberised trail would offer a safe, all-weather surface which could be used all year round.
